

XM Satellite Radio is the best thing to happen to radio since it began broadcasting. Please reject the NAB's petition 04-160. The best part of XM is no commercials, variety and weather and traffic information when I need it, not when the commercial stations think I need it. I pay for XM radio and the NAB should not be allowed to dictate what I want to listen to. This is just another example of the giant American corporate machine bull dozing its competition in an effort to maintain control and limit the choices of Americans. Please do not allow this to happen. I listen to XM radio because it is better than commercial radio.
